

ABOUT US

About Spaceti

Spaceti, founded in 2016, is a pioneer in the application of fully integrated location based IoT hardware and software technology for smart buildings. The mission of Spaceti is to provide tools to radically change how people interact with buildings which leads to greater levels of safety and wellbeing of the occupiers and enables more efficient service delivery for operators. Spaceti has operations in Prague (HQ), London, Zurich, and Berlin. <https://spaceti.com/>
